ETG Series
Stand-Up End Control Trucks
3,000 - 5,500 lbs. capacity
The ETG series of stand-up counterbalanced lift trucks are an ideal material handling solution for a wide range of heavy-duty industrial applications.

The Jungheinrich® ETG series is designed to maximize performance when you need to shuttle goods, load and unload trailers or move large loads in a confined space. Available in 3,000 – 5,500 lb. capacities, these high-performance, 36-Volt AC lift trucks can reach lift heights of up to 276 inches.

Benefits include:
- Increased performance.
- Greater productivity in any application where space is at a premium.
- Space-saving design allows the truck to stack and retrieve goods efficiently in narrow aisles and at high lift heights.
- Customizable drive and hydraulic settings to suit the application and operator’s experience level.
- Relaxed and comfortable operators with less fatigue over long shifts.
- Less maintenance and longer operating times.

Solution-Based Flexibility In One Sleek Design
**AC Drive System**
Rapid acceleration, smooth directional changes, precise speed control and handling are just a few of the advantages of the Jungheinrich ETG series’ AC drive system. Individual performance features such as travel speed, acceleration rate and regenerative braking response can all be customized to fit application requirements.

**AC Hydraulic System**
Jungeinrich’s AC hydraulic system provides smooth load handling and precise load placements. Hydraulic cushioning is built into the mast staging function to minimize unnecessary shocks to the truck and to the load.

**Programmable Performance**
Performance profiling allows you to customize individual drive and hydraulic settings based on the application or operator experience level, either through the display or through a laptop or handheld.
Operator Comfort
- The convenient location of controls allows for a flexible side stance position in the operator compartment.
- An anti-fatigue floor mat, generous padding for knees, hip and arms and spacious compartment keep operators comfortable over long shifts.

Controls
- The intuitive, multifunction control handle is centrally positioned for easy access to truck functions and offers simultaneous control of drive, lift, lower and auxiliary hydraulic functions.
- Electric power steering promotes precise steering control with minimal effort, without encroaching into the operator compartment.
- The dual pedal design requires the operator to have their right foot on the presence pedal for all drive and hydraulic functions to operate and their left foot on the traction pedal to begin travel.

Informative Operator Display
The easy-to-read control panel displays the information the operator needs to perform daily tasks:
- Travel speed.
- Travel direction.
- Battery state-of-charge.
- Load weight display.
- Text messaging of truck status and limiting conditions.
- Informational and warning icons.
- Language options.
Ease Of Service. High Reliability.

AC technology, rugged construction and advanced electronics allow the Jungheinrich ETG series to spend more time moving pallets and less time sitting idle.

Diagnostics
- Display-based diagnostics allow service technicians to quickly access a 32-event fault history folder and troubleshoot the truck – often without the use of additional diagnostic tools.
- Additional troubleshooting and diagnostics can be performed using a laptop or handheld device.

Service
- Up to 500 hour service intervals can reduce the amount of time and expense spent on maintenance of your fleet.
- Brushless AC motors require no brush or spring maintenance or replacement.
- The AC control system optimizes energy efficiency and simplifies service by enabling the exchange of individual components.
- Pump motor, drive motor and control panel feature individual thermal protection systems to guard against overheating.
Who Is Jungheinrich?
Your Trusted Partner
For More Than 60 Years.

Founded by Dr. Jungheinrich in 1953
Jungheinrich, the leader in system technology in Europe, offers a comprehensive product range of material handling equipment and rack systems as well as services for complete intralogistics.

Jungheinrich has evolved from a producer of material handling equipment to a manufacturing logistics service provider.

How does the company rank?
Jungheinrich has progressed from its early beginnings to one of the world’s leading suppliers of:
- industrial trucks
- warehousing technology
- material flow technology

Jungheinrich is also one of the world’s largest forklift suppliers. This growth is substantially due to the company’s strict adherence to top quality design and technological innovation – as evidenced by its proprietary AC motor and controller technology, as well as a host of productivity and ergonomic enhancements.

Local support throughout North America
Jungheinrich has strategically-located service support centers and more than 330 dealer / service facilities throughout the U.S., Canada and Mexico.

Parts when you need them
Jungheinrich’s Parts Fast or Parts Free Guarantee ensures next-business-day delivery by 5:00 PM of all Jungheinrich parts in the United States, or they’re free, including freight. For customers in Canada and Mexico, the guarantee ensures shipping of parts within 24 hours from the time the order was placed by the dealer. See your local Jungheinrich dealer for program details.

*Orders must be placed through your local dealer by 5:00 p.m. Eastern Standard Time, and you must advise the dealer at the time of order that the part is to be expedited under the terms of the guarantee. There are some exclusions, including parts over 100 lbs and paint, chemicals or lubricants that require special handling. Ask your dealer for a full list of terms and conditions for the Parts Fast or Parts Free Guarantee. Programs may be subject to change without notice and may vary by region. Please ask your local Jungheinrich dealer for complete terms and conditions.
Why Purchase A Stand-Up End Control From Jungheinrich?

Benefits like these:

• Maximum performance and productivity.

• High efficiency, with energy reclaimed while braking.

• Outstanding ergonomics and superb visibility.

• Cushioned hydraulics for smooth, steady handling.

• Extended maintenance intervals help minimize operational costs.

• Ease of diagnosis, troubleshooting and servicing.

• Programmable performance.

• Intuitive multifunction handle for improved control.

• Options to adapt to application needs.

• Service and support from your local Jungheinrich dealer network.

• Parts Fast or Parts Free guarantee.
