Standard Equipment

Vehicle Management
Engine Control Module (ECM) to monitor engine performance
Easy-view meter panel with critical system checks & warnings

Durability Features
Wide carriage
Robust mast

Servicing Ease
5-piece overhead guard
Safety footsteps
Gas spring assisted engine hood
Easy access filter/fluid service points

Powertrain
Common rail fuel injection with turbo charger and intercooler
Automatic 2-speed transmission
Engine temperature protection system
Floating powertrain for reduced vibration
Transmission mode selector
Heavy-duty, cushion-mounted radiator
Hydraulic oil cooler (17,500 & 22,000 lb. capacities)
Large engine oil filter and dual diesel fuel filters
Electric glow system
Cyclone air cleaner

Steering System
Adjustable tilt steering column
Small diameter steering wheel with spinner knob
Hydraulic power steering
Rugged steering column

Brake
Parking brake with warning buzzer
Hydraulic brake system with pressure accumulator
Inching pedal

Hydraulic System
3-spool hydraulic control valve
Hydraulic load sensing valve system
Triple hydraulic pumps mounted on transmission to reduce power consumption

Operator Conveniences
Full suspension seat
Deluxe standard light package with:
Overhead Guard mounted headlights/front turn signals
Rear combination lights – tail, brake, and back-up
Back-up alarm
Rearview mirrors
Cushioned floor mat
Heel-to-toe pedal design

Protection/Security
Operator Presence System:
• Seat actuated auto-mast lock system
• Automatic return-to-neutral
• Seatbelt warning
• Parking brake warning

To learn more, and find a dealer near you, visit UnicarriersAmericas.com

Unicarriers’ roots extend back over 100 years, and over that time, strong, reliable performance has always been the hallmark of our organization, our people and our equipment.

Today, our unrivaled reliability continues to provide Unicarriers’ customers with a competitive edge. And together, we move the merchandise that moves world commerce with greater efficiency, economy and reliability.

When it comes to providing forklifts that make a difference for our customers and theirs...

We Never Quit.
Rugged durability, innovative technology and unsurpassed reliability are the hallmarks of GO6 Series performance… and the traits that make it the ideal choice for:

- Lumberyards
- Brickyards
- Warehousing
- Recycling
- Manufacturing
- or any job requiring brawn and brains

NEVER QUIT.

It defines our forklifts and the company that builds them.

Over the course of a century, the company known as UniCarriers took shape. As we grew and evolved into a US manufacturer with a global reach in nearly 100 countries worldwide, much has changed, but one thing hasn’t: our mission. UniCarriers is committed to providing you with the ultimate in reliability, performance, and value.

And that commitment can be seen in the GO6 Series. This workhorse is built for your biggest jobs, your toughest applications, and lifting and hauling your heaviest loads with amazing speed, productivity and reliability. The GO6 also delivers a low cost of ownership while offering lower emissions. It’s backed by the best standard, limited warranty in the business. And, for all its brute strength, the GO6 brings operators unsurpassed comfort. So, if you’re looking for a forklift that can do it all, take a close look at the GO6.
Steering in the Right Direction
The GO6’s rugged steer axle incorporates a steering cylinder housed inside it to protect against possible damage from obstacles on the road surface. It also features a simplified design with a reduced number of service points for quicker, simpler maintenance.

Protecting Your Investment
The advanced Engine Protection System on the GO6 automatically reduces engine speed in the event of overheating. The meter panel also features a warning system that alerts the operator to help protect the machine’s critical components. For example, the coolant level and air cleaner performance are constantly being monitored.

Advanced Features for Longer Life
The GO6’s cyclone air cleaner extends filter life and reduces dust and debris that can get caught in the engine. In addition, a sensor on the dash panel indicates if there is inadequate airflow to help prevent loss of performance or overheating.

Easier Access Means Easier Service
To cut maintenance time and costs, the GO6 offers fast, easy access to key systems. Components that require regular changing or inspection – such as filters, fluids, and batteries – can be accessed quickly and easily. The engine hood has gas-spring supports to open and close easily.
Comfort Zone

When it comes to productivity, comfort isn’t a luxury — it’s a necessity. That’s why the GO6 features enhancements throughout its design to reduce operator fatigue, while improving operator performance. It begins with a spacious compartment, greater visibility, and ergonomically designed and logically positioned controls. But that’s only the beginning. From the moment your operators step into a GO6, they’ll know they’re stepping up to greater comfort and convenience.

A Step Up

The GO6 simplifies operator entry and exit with a convenient hand grip and an extra-wide 3-step entry that includes a diamond tread or non-skid step for sure footing.

A Smoother Ride

The GO6 features a floating powertrain that includes independent dampeners to reduce vibrations that can cause operator fatigue. Vibration is further reduced by rubber shock absorbers located throughout the truck, and a standard thick, rubber, non-slip floor mat.

Visibly Better

Our super-wide carriage provides operators with improved forward and fork tip visibility for greater security and enhanced productivity. This added visibility is matched by generous headroom and plenty of foot and leg room. There are also automotive-type controls and a small diameter steering wheel — all to reduce operator fatigue, while boosting operator confidence.

Greater Support

Operators can ride in comfort and maneuver with greater confidence from the full-suspension seat. The seat reclines, and adjusts easily to match its operator’s weight. There are even side supports and fore-and- aft positioning for extra-customized comfort.

Sure Stopping Power, Even in an Emergency

The low pedal angles allow heel-to-toe movement between the gas and brake pedals. Plus, the GO6 features a full hydraulic powered brake system for sure stops and less operator fatigue. The system even provides emergency braking power in the event the engine is stopped.

At the heart of GO6 is one of the most powerful, durable and efficient diesels in its class. This turbocharged, electronically controlled engine pours out massive torque at low rpm – producing very low emissions. We’ve matched this rugged power plant with an arsenal of proven components, like a rugged transmission, triple hydraulics, and an extra large cooling system—all to turn the power of the GO6 into profits for your business.

**Power & Performance**

**Higher Performance Right from the Start**
The GO6 features an Electronic Glow System for superior cold weather starting. And once a GO6 gets going, it moves fast thanks to a heavy-duty, electronic, two-speed transmission that delivers efficient power transfer. The result? Some of the fastest lift speeds in the industry.

**Triple Hydraulic System**
The GO6 features a triple hydraulic pump system — one for lifting, one for steering, and one for braking. The result? The operation of one function doesn’t impact the performance of another. For example, there is no loss of steering or maneuvering capabilities while lifting.

**Common Rail Fuel Injection for Uncommon Performance**
The GO6’s advanced engine technology includes a common rail fuel injection system, which uses the optimal amount of fuel at the ideal time, resulting in greater power with improved fuel economy.

**More Power with Lower Emissions**
The engine’s turbocharger creates more power by compressing the inlet air and forcing it into the chamber. This constant pressure boost occurs over the entire rpm range, for greater torque at even low speeds. An intercooler raises power further, while offering a substantial reduction in nitrogen oxides and particulate matter emissions through its Exhaust Gas Recirculation system – thanks to this innovative technology, the GO6 emits low exhaust levels.

**Another Cool Idea**
The highly reliable cooling system on the GO6 is designed to keep its cool even under heavy usage and high temperatures. The system includes a large, heavy-duty radiator that is rubber mounted to reduce flexing and absorb vibration.

**A Mast That Can Lift Your Entire Business**
Robust mast construction features larger rail dimensions to more easily handle heavy loads, and provides exceptional reliability and enhanced visibility to the load for greater operator confidence.
The GO6 offers you a lot of power, including the power to save money. Whether it's the durability of its chassis and mast, its heavy-duty components, its design innovations that simplify and extend maintenance, or its ergonomic compartment layout that lifts productivity, the GO6 is engineered to raise your profits, while lowering your costs.

**Sweet Savings**

**Our Overhead Guard Reduces Your Overhead**

Beyond ample headroom, the five-piece overhead guard takes 75% less time to make needed replacements versus competitive designs using a single-piece, welded-on guard. That cuts downtime and costs.

**Boltless Floorboards**

Ready access to key components can save you time and money during routine maintenance. That's why the GO6 makes those components readily accessible. The front and rear floorboards can be removed and reinstalled quickly and easily without any tools to gain access to the transmission and hydraulics.

**Engine Compartment**

Operators and service technicians can access the engine with ease using the remote engine hood release lever. Two gas spring assists make opening the hood easy, and, of course, no tools are required. On the GO6, all routine maintenance points are readily and easily accessible for quick servicing, including:

- Oil check
- Radiator fluid
- Engine Control Module
- Dual fuel filters
- Oil filter
- Battery compartment
- Electrical system

**Matching Work Conditions**

The GO6 features a transmission mode selection switch that changes the shift speed pattern of the transmission, allowing your operator to select the best mode for the current working conditions. Operators can choose a Normal Mode, Gradient Mode for working on slopes with heavy loads, and a High Speed Mode for longer trips. This feature improves both operating efficiency and fuel economy.
Play It Safe

Safety is everybody’s business, and when it comes to safety, the GO6 is all business. From greater visibility to better handling, from lower emissions to enhanced reliability, the GO6 helps you create a more productive workplace without sacrificing safety. Whether your operators are running the truck or exiting it, the GO6 has a system in place to help protect them and everything — and everybody — around them.

Operator Presence System

This comprehensive safety system includes a seat-actuated power interrupt with mast-lock, automatically preventing lift and tilt operations if the operator leaves the seat. The return-to-neutral feature minimizes forklift movement if the operator leaves the truck while still in gear. Other audible and visual warnings come standard, including a parking brake alarm.

A Good Start

A neutral start mechanism prevents the engine from being started unless the directional control lever is in the neutral position. This prevents the truck from moving abruptly when the starter switch is turned.

Right In View

Designed for maximum clarity, and featuring indicators that are brightly lit with long-life LEDs, the instrument panel is easy to read and simple to understand – so operators can focus on their jobs.

A Less Fatigued Operator

The GO6 includes an array of features designed to prevent operator fatigue: from the adjustable, full suspension seat to responsive hydrostatic steering, to heavy insulation that reduces noise and engine heat, to ergonomically positioned controls, to our floating powertrain that reduces vibration, the GO6 is designed to keep operators alert and in control.

Deluxe Light Package Is Our Standard

The GO6 features overhead guard-mounted headlights to enhance operator visibility. Our Deluxe Light Package includes front turn signals mounted on front pillars for high visibility, and a rear light combination that includes brake, turn, and backup lights, as well as reflectors. There are also dual rearview mirrors for greater operator confidence.
The GO6 is engineered to give you and your operators more control. When it comes to your operation, the GO6 can help you better control costs, downtime, and workflow. For your operators, it offers innovations that give them more control when handling loads, maneuvering, and servicing the vehicle. Whether you're running the operation or operating the forklift, you're always in the driver's seat with a GO6.

The rugged GO6 comes with a wide array of standard features that maximize uptime and productivity. We also offer a complete menu of options to customize your forklift to your specific requirements. Check out this list, and if you don't see what you're looking for, contact your Nissan Forklift by UniCarriers dealer for more options.

### Specifications

**Model** | **Load Capacity** | **Overall Width** | **Min Outside Turning Radius** | **Displacement** | **Bore x Stroke** | **Torque** | **Output**
--- | --- | --- | --- | --- | --- | --- | ---
FD100-2 | 22000 (10000) | 88.4 (2245) | 152.8 (3880) | 316.9 (5.2) | 117 (87) @ 2000 | 359 (486.7) @ 1500

*Based on 600mm load center

### Information At A Glance

- Low engine oil pressure
- Coolant level
- Battery charge
- Check engine
- Fuel gauge
- Speedo
- Neutral transmission
- Air cleaner
- Engine pre-heating glow plug
- Engine coolant temperature
- Parking brake

### Make It Yours

- Wide Hook Type Carriage – 34.9 in. (900mm) Wide
- Integral Sideshifter – 66.9 in. (1700mm) Wide
- 4-Spool Valve & Lever
- Clamp Release Interlock – required with clamping attachments
- Mast Tilt Gauge
- Vertical Exhaust
- Air Intake Pre-Cleaner
- Double Element Air Cleaner
- Rear Work Light
- Rotating Beacon – Amber

### Adjustable Steering Column

The GO6 is equipped with an infinitely adjustable tilt steering wheel – its small diameter design and spinner lends give drivers precise control of the machine during travel.

### Precise Handling

The GO6 includes a separate inching pedal for small, precise movement. The open floorboard area also offers more foot and legroom, while the low pedal angles allow heel-to-toe movement between gas and brake pedals for easy handling.

### Greater Maneuverability

With rugged, dual drive, pneumatic tires, the GO6 offers ground hugging traction and smooth handling when traveling. The hydrostatic power steering system also provides superb maneuverability, with fast, precise response to navigate loads through tight areas.

### Control Freak

The easy-view meter panel enhances driving ease and provides constant status on critical systems. The highly visible gauge give an accurate readout on fuel and coolant temperature, and include an hour meter and error codes. The bright LED warning lights give-up-to-the-second alerts on:

- Low engine oil pressure
- Coolant level
- Battery charge
- Engine pre-heat
- Neutral transmission
- Air cleaner
- Engine coolant temperature
- Parking brake
